

1. Consider the position vs. time graph below for cyclists A and B.

- Do the cyclists start at the same point? How do you know? If not, which is ahead?
- After $t=5s$, which cyclist is ahead? How do you know?
- Which cyclist is travelling faster at $3s$? How do you know?
- Are their speeds equal at any time? How do you know?
- What is happening at the intersection of lines A and B?

2. Consider the position vs. time graph below for cyclists A and B.

- How does the motion of the cyclist A in this graph compare to that of A in the graph on page one?
- How does the motion of cyclist B in this graph compare to that of B in the graph on page one?
- Which cyclist has the greater speed? How do you know?
- Describe what is happening at the intersection of lines A and B.
- Which cyclist has traveled further during the first 5 seconds? How do you know?
