

## CLS 1 – Graphing and Measurement

Students will be able to correctly use measuring devices to measure a variety of different quantities.

1a: knowing the definitions and being able to measure mass, volume, and length

1b: choose the appropriate units for items

1c: knowing the metric prefixes

1d: being able to convert to smaller or larger units

1e: create different types of graphs

1f: interpolate and extrapolate data from a graph/data table

1g: calculate slope from line graph
